Phospholine Iodide Information

---

## Important Information About Phospholine Iodide Availability

Dear Healthcare Professional,

We are happy to announce that Fera Pharmaceuticals is preparing its launch of Phospholine Iodide<sup>®</sup> (echothiophate iodide for ophthalmic solution), making it available for you and your patients starting May 31st.

As you may know, product supply has been inconsistent in the past. However, Fera and its suppliers are wholly committed to ensuring availability of Phospholine Iodide.

For you and your patients' convenience, we have entered into a distribution agreement with AllianceRx Walgreens Prime Specialty Pharmacy. They will fulfill your prescription and deliver the reconstituted ophthalmic solution directly to your patient. Their expert specialists will provide services to help facilitate patient access, drive improved outcomes and better adherence. These services include conducting a complete review of benefits, helping facilitate prior authorization, and communicating with physician offices and insurance companies to assist with insurance appeals. If you'd like to contact the pharmacy directly, please call 888-347-3416.

We will provide more information shortly, including details on how and where to send your Phospholine Iodide prescriptions. You can also check our website for updates at [www.ferapharma.com/products/](http://www.ferapharma.com/products/). [contact@ferapharma.com](mailto:contact@ferapharma.com).

Respectfully,

Michelle Kim, Pharm D.  
Senior Director, Regulatory Affairs and Quality
